Project: QuizMindUp

About project: Company mission is to build the best skills testing & recruitment platform for recruiters and companies to help them hire the best candidates and evaluate existing employees while saving their time and money.

«FollowBrain.Com» cloud-based (Software as Services) Candidates' and Employees' assessment Portal. It is mostly for HRs, recruiters, entrepreneurs and any person who wants to make the assessment of their candidates and staff via portal. They will get dedicated and separated URL Dashboard (like <https://nameofcompany.followbrain.com>). Within our portal, HRs, can build their own tests and assess the candidates and employees. Besides, there will online store with tests, questions database which was created and sell by experts. Within our software, they can arrange surveys, generate certificates and automatically get CVs of candidates which they received to email. Beside dashboard for HRs and recruiters, there will separate Exam Center (like: <https://nameofcompany.followbrain.com>) for candidates and employees. They (external users) will enter to that exam center and within or without registration or by entering special ID code, they can start exam and answering the questions. It is completely 24/7 cloud and secured based services which you can evaluate your candidates and employees.

The key users of dashboard:

- HRs, Recruiters and their employees;
- CEO and managers of SME;
- Training manager & coordinators;
- Evaluation and monitoring specialists;
- Educators and education experts;

The key users of external Exam center:

- Candidates and employees;
- Students.

Main problems which HRs, recruiters are facing

Below main problems which HRs, Recruiters are facing:

- Waste of employer's time during recruitment screening process with non-suitable candidates;
- Mess of CVs based on announced vacancies in outlooks which is too hard to sort and search
- Absence of tools and techniques for employee competency and knowledge assessment
- Transparency in hiring process, no external 3-d part company;
- No centralized tests/quizzes' system and processes
- High price of assessment software tools
- No dynamic tools (API) integrated with portals to assess their users
- No such SAAS tools & exam stores' database in CIS countries (inc. Azerbaijan, Georgia and etc.);
- Current economical situations in CIS and global (mostly interested in chipset solutions).
